Tangra, Inc. Becomes a “Front Runner” With the Release of Its Latest Solution, SQL Studio Data Compare

West Bloomfield, Michigan – March 31, 2006 – Tangra, Inc. today announced it will launch a new application using Microsoft SQL Server 2005, earning the company Front Runner status from Microsoft Corp. SQL Studio Data Compare in combination with Microsoft SQL Server 2005 helps enable customers to compare, synchronize and merge data in a simple, fast and efficient way. SQL Server 2005 is the next-generation data management and analysis software that will deliver increased scalability, availability and security to enterprise data and analytical applications while making them easier to create, deploy and manage.

“Microsoft has always been committed to the success of our broad ISV partner community and will continue to rely heavily on that community to drive innovative solutions to market,” said Pradeep Rathinam, general manager of U.S. ISV Strategy in the U.S. Partner Group at Microsoft. “The Front Runner program was designed to provide our partners with the best development environment possible and give them the technical and marketing tools they need to be successful over the long term.”

Microsoft wanted to ensure that ISVs had access to a full host of benefits to enable them to bring best-of-breed solutions to market more quickly and effectively. Giving ISVs the resources they need to fast-track the development of these applications enables customers to start taking advantage of the increased scalability, availability and security of the application built on top of SQL Server 2005 almost immediately, increasing their company’s productivity.

“Tangra, Inc. is excited to support SQL Server 2005 because it’s a great platform and a great leap forward,” said Plamen Ratchev, President of Tangra, Inc. “Achieving Front Runner status enables us to deliver applications to customers within the same timeframe as the launch of SQL Server 2005. As a result of the solution we have developed, we are uniquely positioned to help our customers get the most from their technology investment.”

SQL Studio Data Compare automates critical processes such as comparing, merging and synchronizing data.

The Microsoft ISV/Software Solutions Competency recognizes the skill and focus partners bring to a particular solution set. Microsoft Gold Certified Partners that have obtained this competency have a successful record of developing and marketing packed software based on Microsoft technologies.

Tangra, Inc., a Microsoft Gold Certified Partner, is a software design and development firm specializing in database and Web applications. For more information visit <http://www.TangraInc.com>.
